

# FENDER BASSMAN 70-BASSMAN 135

# BASSMAN 70—BASSMAN 135

## ...True tone—powerful performance—power choice

Listen to Bassman amps and you'll know the reason for their world-wide popularity. Extraordinary, uncolored sound is delivered by Bassman 70's two heavy-duty 15" speakers mounted in a specially designed enclosure, amplified by 70 watts RMS power with 154 watts peak music power. Separate controls on each dual channel. Bassman 135 can fill an auditorium or club. 135 watts RMS power with 297 watts peak music power delivers outstanding amplification. Two heavy-duty 15" speakers are housed in an enclosure designed to take advantage of room acoustics. Team one with your Fender bass and bring down the house.
